

# Marc García Campobadal

## Full-stack Software developer

I am a web developer with 3 years of experience working on applications, PHP solutions, and information security. I am passionate about learning new technologies and solving complex problems efficiently. My latest project involves securely managing user sessions with encryption. I am looking for a team where I can continue to grow and contribute my skills in development and teamwork.

## WORK EXPERIENCE

### Full-stack Software Developer (Internal/Junior)

Logista Group

12/2023 - Present

#### Assignments

- Participated in the development and improvement of internal logistics applications, including dashboards and management tools.
- Created and maintained small internal scripts and services using Node.js and JavaScript.
- Collaborated on the integration of REST APIs and supported the implementation of new features.
- Assisted in testing updates and validating fixes on internal platforms, applying best practices for development and security.
- Monitored data and performed basic analysis to optimize internal processes.

### Freelance

Remote

09/2024 - Present Gavà, Barcelona

On the frontend, I work with key tools such as HTML, CSS, and JavaScript, while on the backend, I am proficient in Java, Python, and PHP. Additionally, I have experience with databases like MySQL and SQLite, and popular frameworks such as Flask and React. I am familiar with working environments in both GNU/Linux and Windows, and I have a strong understanding of technologies like SSH, Git, and the HTTP protocol, which enables me to develop complete and efficient solutions with a focus on security and performance. I am currently working on a future business marketplace project.
